Aluminium is a non-combustible material, eliminating the risk of damage from fire.

A-Fence achieves **A2-s1, d0** fire rating, proving its non-combustibility. The shift towards using non-combustible materials in recent years across the construction industry has underlined the importance of the choices we make in regard to the materials we use to prevent any costly future remediation. Among the drawbacks of wood in

fence panels is its tendency to absorb moisture in rainfall. This causes them to expand and contract, gradually forcing their support panels to shift out of place and the panels to warp.

Aluminium, of course, is non-porous so does not absorb water, eliminating the fear of support panels shifting, warping or being dislodged.

Colour & Design

Available finishes include our 6 standard colours, (RAL 7016, 9016, 6021, 9005, 7001, 8017) all in a sleek powder-coat, providing a range of aesthetically pleasing options to suit any property.

Configurations

The aluminium fencing panels are available in 3 sizes; 50mm, 100, and 150mm.

With the option of having them spaced out through the use of our spacer cover strips for an open design, or for a private feel you can opt to have them fitted closed together similar to traditional fencing.
