Your best option
for heat or glare

Conservatory Sail Blinds
Product Guide

Conservatory Sail Blinds

InShade conservatory sail blinds are the modern, efficient way to control heat and glare in your conservatory. InShade uses ISX, an exclusive solar control fabric that reflects heat, provides shade and cuts harsh rays, transforming your conservatory into the perfect summer space.

Designed and manufactured in the UK, our sail blinds allow you to get the maximum enjoyment from your conservatory. A patented tension edge keeps the sails taut and makes them easy to remove and clean. InShade sails are manufactured from premium materials for a long life, backed by a 10 year warranty.

Features

Exceptional solar performance with up to 73% solar reflectance, significantly reducing heat gain and eliminating glare.

Machine washable for simple, effective cleaning to maintain looks and performance.

10 Year warranty on all fabrics and fittings.

For all styles and spaces

InShade sails are versatile and effective, and their simple design complements the style and dimensions of any space. Unrestricted by small or awkwardly shaped windows, your InShade sail design can range from simple and elegant to wild and wonderful, or anywhere in between.

InShade provides a solution tailored to your specific requirements, providing the shade needed while maintaining a light-filled space and an open view. The fabric's special structure eliminates glare while bathing your room in soft natural light.

InShade ISX

ISX is a unique, UK-made, solar control stretch fabric that provides shade, reflects heat and diffuses sunlight.

We developed this fabric to handle the extreme temperatures found in UK conservatories. Since 2013 ISX has set an unmatched standard in solar performance.

With 96% solar efficiency, InShade white sails absorb less than 5% of the sun's heat, reducing heat transfer into your conservatory.

Colour Range

Our solid colour range offers subtle, natural tones. All solid colour fabrics provide ISX's best-in-class solar performance, providing heat control and exceptional value.

Our Duplex ISX fabric further enhances solar performance - with a white side facing the sun to maximise heat reflection. This innovation allows the use of dark colours on the side you see without compromising solar performance or durability.

Colour Match

Our colour match option allows you to match InShade sail blinds to any colour by simply providing a sample.
