Outstanding enjoyment with Harol

New build or renovation? Classic or modern? Our solutions are outstandingly versatile and perfectly adaptable to suit your family, architectural style and type of building. Moreover, they effortlessly meet the increasingly stringent requirements in terms of comfort, safety and energy efficiency. For three generations we have been building on our experience in sun protection, roller shutters and outdoor solutions, and it shows!

In addition to creating a lasting value, Harol is also a real trendsetter. We are continuously innovating and perfecting. This is the only way we can succeed in our mission: by ensuring you can enjoy a customized solution that offers you everything. And only the best is good enough!

Annick Draelants
CEO Harol

*Whichever solution you choose,
you benefit fully from these advantages:*

Comfort

The motorized Harol solutions guarantee ultimate user comfort. Using a remote control, smartphone or tablet; one command operates all our products. Are you looking for 100% trouble-free operation? Opt for automatic controls. This solution will take care of all the controls. You can relax, as the settings are always optimal.

Security

Harol products not only add character to your home, they also protect your family from unwanted visitors. Our specially-developed security packages go even one step further. Smart solutions, robust equipment and automatic control systems provide even more barriers. And during extended absences these will give the impression you are still at home. This way no one can jeopardize your sense of security.

Design

Our extensive range of roller shutters, sun protection and outdoor living products complements the most diverse architectural styles, from classic to ultramodern. We customize every solution. Choose from more than 300 RAL colours, scratch-resistant textured coatings and colour foils (only for our gates). We know how to harmonize our solutions with your living style.

Energy efficiency

Save resolutely on your energy bills with Harol's energy-efficient solutions. Our solutions keep abreast of the increasingly stringent requirements regarding energy consumption. Thus, the innovative elements we incorporate, are the optimal solution for shutting out sun and cold. For maximum efficiency, our solutions can be programmed to respond to the many diverse weather conditions.

These features - along with the largest selection on the market - make our solutions the ultimate reference...

Genuine must-haves!

Revolutionary!

The latest generation of roller shutters: Silensio™

40%
LONGER
LIFESPAN

World-class innovation

The Silensio™ roller shutters combine the new generation Somfy motor with the innovative roller shutter technology by Harol, resulting in a focus on ease-of-use, durability, energy-savings and security. These new roller shutters are smarter, but above all quieter. Much quieter. And with a 40% longer lifespan, they are also the most reliable on the market. Who can resist these benefits?

Superior living comfort

The Silensio™ roller shutter represents a new generation of roller shutters that is almost imperceptibly present in your home. The ultra-quiet tubular motor is quieter than any other household appliance! With an almost inaudible 'soft start & stop' function, the typical sound of slats clattering together is eliminated. Also, there are two speed settings, depending on the home owner's requirements. The obstacle detection function is extremely sensitive and will take effect immediately when needed.

HAROL[®]

Ultimate comfort

Make the switch!

Discover the many benefits of electric roller shutters

You can opt for manual operation using a tape or crank, but nothing is as easy, comfortable and efficient as an electric motor. One press of the button, and your electric shutter opens or closes, quickly without applying any muscle power.

For even greater convenience, security and energy-savings, we recommend the io-homecontrol® system. This genuinely offers the ultimate in comfort!

Why is io-homecontrol®* a must-have?

- Thanks to io-homecontrol® technology by Somfy, you can control and monitor the position of your roller shutters remotely.
- One instruction on your smartphone is sufficient to roll down your shutters.
- Rolling down your roller shutters becomes an easy reflex, making your home more secure in an instant.
- You can set up scenarios before leaving your home, for example for bedtime etc.

Timer

Hand-held transmitter

Wall transmitter

Smartphone or tablet

You can choose between five types of motors, each with numerous benefits:

Standard electric	RTS	io*	Silensio™	Solar
<ul style="list-style-type: none"> ✓ No tape or crank required ✓ More ease of operation ✓ One push of a button is sufficient 	<ul style="list-style-type: none"> ✓ Radio-controlled ✓ Wireless transmitter (wall transmitter, manual operation) ✓ Timer options ✓ Obstacle detection ✓ Frost protection ✓ Intruder-proof ✓ Home automation with Tahoma Switch available ✓ + All the benefits of a standard motor 	<ul style="list-style-type: none"> ✓ Extra security due to feedback to the transmitter ✓ Option to set scenarios ✓ Detailed automation options ✓ Worldwide operation with status update** ✓ + All the benefits of an RTS motor 	<ul style="list-style-type: none"> ✓ Ultra-silent ✓ 40% longer lifespan ✓ Optional 2 speeds ✓ Soft start & stop ✓ Superior obstacle detection ✓ + All the benefits of an io motor 	<ul style="list-style-type: none"> ✓ 100% solar-powered ✓ Powerful 2.2 Ah battery ✓ Battery stored in the box as standard ✓ Superior obstacle detection ✓ Frost protection

* To control the roller shutters with io-homecontrol® you need a TaHoma Switch.

** Operation from a smartphone and/or tablet with a status update of all connected products.

HAROL[®]

Surface-mounted roller shutters

Are your windows not ready to be replaced yet? Then surface-mounted roller shutters could be the answer. Even if you did not have shutters fitted when your new home was built, there is no need to worry! Harol surface-mounted roller shutters can be fitted at any time, without the need for elaborate reconstruction or demolition work.

Why not install roller shutters? They will provide extra comfort all year round! In winter they keep in the heat, and on hot days your house is kept comfortable and cool. Roller shutters not only shut out the outside light, they also reduce street noise. And best of all: this investment pays for itself. Your house is more insulated, so you spend less on heating or cooling. Add to that the additional privacy factor, and an increased sense of safety, which means you will never want to be without your shutters again!

HAROL

VR150 Solar and VR200 Solar

Energy-saving

Use free energy

A Harol Solar roller shutter operates completely independently on solar energy and has an excellent performance, even in less than ideal weather circumstances.

Other strengths are:

- Ready to use: the charged battery runs immediately after installation
- Greater ease of use with the wireless, radio-controlled motor
- Heat and cold resistant: battery operates in temperatures from -20 °C to +70 °C
- Custom: choose from five types, depending on the desired motor strength
- Simple to install onto current windows without the need for demolition or electrical work
- Extra energy-savings: the roller shutter does not use any electricity

Security package

Safety first!

Opt for additional security

Roller shutters are an additional deterrent to intruders attempting to break into your home. They contribute significantly towards the increased security of your property. Nowadays you can go one step further; certain components can be additionally safeguarded. A number of options are:

- **Lift security system:** the curtain is attached to the rod with shackles. These completely lock the shutter curtain, making it much harder to lift.
- **Extrusion box from extruded aluminium:** makes the shutter more rigid, thicker, stronger and more stable.
- **Safety guide rail:** thicker than a standard guide rail, making it harder to pull open the curtain.
- **Safety bottom lath:** fitted with an extra wide lip to make it difficult to grip.
- **Safety slat:** filled with an extremely hard foam to make the slat even more rigid.

VR150 Silensio™

- Ultra silent
- 40% longer lifespan
- Superior obstacle detection
- 'Soft start & stop' function
- Motor with frost protection
- Two speeds

HAROL

Rosaly Bettens, Business Manager at Naturelle,
opted for Harol roller shutters

“We can now
turn down our
heating in winter”

HAROL®

Women go to beauty salon Naturelle in the quiet town of Houthalen-Helchteren for skin beauty treatments, and now friendly business manager Rosaly talks at length about the many benefits of her roller shutters.

Cosy in winter

“When we moved here, approximately eight years ago, we noticed that the temperature upstairs could become uncomfortably hot. Since we've had roller shutters installed, this is no longer the case.” After renovating the kitchen and the living room, we also had roller shutters installed at the back of the house. “In winter, we can now turn down our heating. This has resulted in significant savings, just by having roller shutters installed. Another pleasant fact: with the shutters down, we can now snuggle up, warm and cosy in the evenings. They shut out the light and give us our privacy.”

One press of a button

Rosaly also finds it very convenient that the shutters can be operated using a tablet or smartphone. “We regularly leave our sash windows open. If I want to go and fetch the children, I don't need to close all the windows. By simply pressing a button I can roll down all the shutters. In no time at all the house is locked up and passers-by cannot peep inside.” Also for indoors this simple way of operating the blinds is extremely handy. “If the sun is shining on my TV screen, it's so simple to quickly do something about it.”

Handy timer function

Rosaly has frequently experienced how her roller blinds have provided her with better sound insulation. “For example, I really do not like thunder and lightning, so when I roll down my shutters, I hardly notice anything. Also, every day jet planes pass by over our house. It always happens at three o'clock, just when my daughter Verolien is having a nap. It is a huge advantage that I can now do something about the noise. And in the evening, the shutters in her room roll down automatically, thanks to the timer function.”

Built-in roller shutters

Thinking of building or renovating? Tip: have built-in roller shutters fitted during the building work. This will immediately enhance the comfort in your home or office. It gives us the opportunity to integrate your built-in shutters seamlessly into the exterior wall: invisible when open, sleek-fitting when lowered. To fit the built-in shutters, space for the roller barrel is required above the window. An additional lift security system can be purchased for optimum protection.

→ *Sleek look,
huge advantages*

HAROL

IB, IB Silensio™ and IB Solar

Exceptionally strong

Each component of this highly reliable roller shutter is designed for durability and smooth operation.

Benefits

- Double-walled slats in PVC or aluminium
- Bottom lath made from extruded aluminium with seal
- Guide rails made from extruded aluminium
- Special side clamps to prevent the slats from sliding together
- Also available on solar power (= IB Solar)

Impressive colour palette

For the bottom lath and guide rails you can choose from all RAL colours (K-250 RAL range) for the standard price, with a wide range of contemporary colours in textured coating.

Built-in roller shutters
HAROL

Built-on roller shutters

Are you planning on replacing your windows? Why not choose built-on roller shutters! Built-on roller shutters are fitted in the window frame and installed as a unit. A practical built-on system that guarantees a trouble-free installation for both renovations and new properties. But you won't discover the real benefits until after the installation. Built-on roller shutters are extremely windproof, for maximum comfort and insulation. Saving you hundreds of Euros per year! And thanks to the contemporary design and robust construction, built-on roller shutters go perfectly with wooden, PVC and aluminium windows. The special finishing profiles ensure the box is flush with the wall and the window frame.

→ *Comply with the most
stringent energy
standards!*
